

G-TEM

Job Description

| | |
|------------|---|
| Job Title | Stamping Technician |
| Department | Production |
| Location | Gloucester, UK |
| Hours | 37.5 per week |
| Pay Rate | Competitive salary based on experience and qualifications |

Role Description

This is a newly established role, involving the use of technical knowledge to get the best efficiencies possible out of our high-tech stamping equipment. This role is based in a heavy engineering and production environment.

The ideal candidate would have a background in engineering or a strong interest in automation. Prior stamping knowledge would also be ideal but is not essential.

Role Duties

- Hands on technical role within our stamping environment, ensuring the best efficiency and performance possible for the equipment. This would be achieved through an in-depth knowledge of machines and their processes, such as machine parameter adjustments, to improve their run rates. Training will be provided for the ideal candidate.
- Liaise with maintenance, press teams, and technical support to improve stamping process efficiencies.
- You would also be expected to support our production staff through training.

Desirable Skills, Experience, and Attributes

- Self-motivated with a desire to improve machine efficiencies.
- Individually driven with strong initiative.
- Good communication skills (written and verbal) and comfortable in providing face to face training.
- General computer skills with a good level of knowledge in Office software (Excel, Word, etc).
- A background in engineering or a strong interest in automation.
- In-depth knowledge of stamping equipment would be ideal but not essential.
- Avid interest in mechanical and electrical automation.

Employee Benefits

- 25 days holiday + bank holidays.
- Monday to Friday working.
- Progression opportunities within company.
- Workwear & PPE provided.
- Free on-site parking.
- Free eye test vouchers.
- Employee referral program.
- Personal development through technical training (engineering bias)
