

# G-TEM

Post title	ERP Systems Analyst
Division	Logistics
Reporting to	ERP Manager

## Post Definition/Purpose

The role will be part of the ERP development team who provide day-to-day support to our QAD MFG/pro system, carry out improvements, system enhancements, etc.

It requires strong technical, functional skills and a desire to deliver techno-functional solutions as part of the wider ERP development team. It also requires that you have excellent interpersonal skills, establish strong relationships within the organization and manage the QAD MFG/PRO user community.

## Key Responsibilities

- Delivery high quality software that meets or exceed requirements and timescale commitments.
- Support system incident resolution activities as required.
- Collaborate with stakeholders to ensure the appropriate solution is delivered.
- Create and maintain technical documentation relating to the project under development.
- Conduct peer review of code and testing.

## Skills & Abilities

- In-depth knowledge of OpenEdge 10.2 or higher.
- Techno-functional knowledge of QAD MFG/PRO 2010 SE.
- Knowledge of Linux operating system (Redhat).
- Knowledge of WebSpeed would be an advantage.
- Knowledge of HTML and JavaScript would be an advantage.
- Knowledge of EDI would be an advantage.
  
- Systematic and analytical approach to problem solving.
- Excellent communication skills.
- Attitudes and behaviours consistent with the company values.
- A strong desire and aptitude to continually develop product and domain knowledge.
- Knowledge of the manufacturing and logistics domain (desirable).
- Enthusiastic and highly self-motivated.
- Able to lead projects from inception.
- The ability to multi-task and see the bigger picture.

## Qualifications

- A relevant IT / Computer Science qualification
- HNC/HND or Degree level

# G-TEM
