G-TEM

Award-winning, world-class manufacturer of automotive body in white components

Quality Auditor

Overall Purpose of Role

You will be working as part of the Quality Department, completing auditing and inspection on parts. In addition, reinforcing quality standards and control e.g. (auditing production processes and areas, product containment, testing and measuring parts, identifying potential problems before they occur)

Role Responsibilities

- EQA and QC auditing
- Checking product quality throughout the day and ensure company procedures are followed.
- Complete relevant documentation, which includes check sheets and dimensional reports
- Levels of paperwork will need to be understood and completed clearly and concisely.
- High levels of manual handling will be required as part of this role
- Able to spot a range of defects in parts easily
- Supporting customer containment / Outflow

Desirable Skills / Experience

- Have an understanding and experience in the use of basic inspection equipment such as Vernier's and micrometres etc.
- Good communication skills (verbal and written).
- Good eye for detail
- Ability to work on own initiative
- Experience of working to targets / timing.
- Experience of working within a quality department
- Basic computers skills.
- FLT licence ideal but not necessary (Training can be completed internally)
- and individually unsupervised at times

Personal Profile

- Enthusiastic individual who can see a task through to completion
- Ability to communicate at all levels confidently and with integrity

- Hands on approach (role is definitely not desk bound) ability to work to procedure logically and systematically
- Able to work on own initiative

Shifts & Salary

- 37.5 hours per week.
- Starting on day shift then to move on to a weekly rotating pattern.
