G-TEM

Award-winning, world-class manufacturer of automotive body in white components

Quality Engineer

Overall Purpose of Role

You will be working as part of the Quality Department, the team deals with inspection of new model and production parts, product containment, testing and measuring parts, identifying potential problems before they occur and implementing processes to stop them occurring, assessing and responding to customer and internal concerns, liaising directly with customers.

Role Responsibilities

- Evaluate and confirm test and measurement data.
- Product confirmation.
- Complete relevant documentation, which includes check sheets and dimensional reports.
- Levels of paperwork will need to be understood and completed clearly and concisely.
- Keeping areas clean and tidy 3S (Housekeeping).
- Able to spot a range of defects in parts easily.
- Investigation of quality issues.
- Liaising with customers at either ours or the customer's sites.
- Completion of 8D / 5Y reports as required by the customer.
- Continuous improvement activity, reviewing processes then planning to improve efficiency and quality.
- Establishing countermeasures to problems and issues by installing error proofing items and systems to stop problems recurring.
- Supporting production when required.

Desirable Skills / Experience

- Experience in the use of inspection equipment such as Vernier's and micrometers.
- Experience in other measurement techniques such as CMM, colour mapping, hardness testing, macro testing, etc.
- Good communication skills (verbal and written).
- Good eye for detail.
- Full driving licence.
- Ability to work on own initiative.
- Experience of working to targets / timing.
- Ability to work as part of a team and on own initiative.
- Experience of working within a quality department.
- Good computers skills.

- Auditing experience desirable but not essential.
- Experience of working to IATF 16949 desirable.
- Able to use hand tools
- Basic Lathe / Machining experience
- Able to read 2D drawings

Personal Profile

- Enthusiastic individual who can see a task through to completion
- Ability to communicate at all levels confidently and with integrity
- Hands on approach (role is definitely not desk bound) ability to work to procedure logically and systematically
- Able to work on own initiative

Shifts & Salary

- This role runs on a day shift pattern, mainly day shifts but early and late shift cover is required on rotational basis long term.
